Illegal Drum Disposal
Removal Action
Dallas, Dallas County, Texas

Attn: Pat Hammack, OSC

Situation: On August 1, 1989 while assisting the EPA Office of Criminal Investigations at an illegal drum dump location, information was obtained from interrogation of suspects concerning a warehouse and an additional dump location. The warehouse and both dump locations contain leaking drums of hazardous substances initiating a classic emergency removal action. ERCS was activated on 08/01/89 with an initial ceiling of \$250,000.

Action Taken: August 2, 1989. Drum overpacking and transporting of 43 drums from the northern drum location to the 10333 Harry Hines Blvd. site. A contaminated runoff path from the warehouse loading dock to the storm water drainage ditch along Harry Hines Blvd. was cleaned. All wastewater was collected and pumped into salvage drums for later disposal and the containment berm removed allowing rainwater to flow normally in the storm drain.

Future Plans: Continue mobilization activities and transport the fourteen (14) drums remaining at the southern drum location to the 10333 Harry Hines Blvd. site. Stage drums in preparation for sampling and hazard categorization. Assist the criminal investigators in their entry into the warehouse to obtain information for the criminal investigation. Soil excavation at both drum locations.
